McGILL WILL ENTER TEAM THIS WINTER

Hockey Club Executive Favours Entering City League.

TO ELECT PRESIDENT.

J. Cully Elected Secretary, and S. Rothschild Appointed Arts Representative.

At a meeting of the Executive of the Hockey Club, held last evening, steps were taken to fill the vacant office of President.

It was decided to call for nominations, which must be signed by 25 students, and handed to the Secretary of the Students' Council on or before Monday next, October 15th, at 5 p.m. The election, which is by general ballot of the student body, if necessary, will be held on October 25th.

J. Cully, Med. '21, was elected to the vacant position of secretary, and S. Rothschild, Arts '20, was appointed Arts representative.

The meeting adopted a motion favouring the participation of McGill in the City League series.

Prospects for the team this year appear to be particularly bright, as a number of men in the Freshmen year come to McGill with quite a reputation. Included in this class are John Gallery and Gaw Dooner, both of whom played on last year's Senior Loyola team, which won the championship of the City League.

It is also rumoured that Barney McTigue will return to college for the second half of the term. This will allow McGill to again hold up their reputation for goalers, as both McTigue and Dooner are past masters at this position.

OFFICIALS FOR TO-DAY'S MEET.

Referee—Prof. C. H. McLeod.
Chief Judge—Dr. C. T. Sullivan.
Judges—Dr. F. W. Harvey, Prof. T. Ludlow, G. Hillier, D. Sutherland, E. M. Busby.
Starter—D. C. Smelser.
Scorers—H. H. Pitts, A. L. Greenwood, D. G. Dunbar.
Clerks of the Course—Capt. J. C. Simpson, T. J. Fox, T. Graydon, J. K. Fawcett.
Time-keepers—Prof. C. H. McLeod, Mr. J. Taylor, W. P. Hughes.
Announcer—H. A. Melville.

SCIENCE '18 ELECTS OFFICERS.

At a short meeting held in the Engineering Building yesterday afternoon, the class of Science '18 elected their officers for the coming session. The results are as follows:
President—C. S. Parke.
Vice-Pres.—L. J. Jordan.
Sec.—Treas.—E. E. Weibel.
Class Historian—H. V. Karnes.
Valedictorian—G. A. Wallace.
Having no business to discuss, the meeting was adjourned.

CAPT. G. L. GALL BACK.

Captain G. Lockhart Gall, M.D., of the Imperial medical forces, who was wounded in the left foot on August 2nd last, and who arrived in Montreal last week, from England, is spending some time at Lachute, the home of his brother, Mr. H. M. Gall.

Captain Gall, who is a son of the late Hugh Gall—in his lifetime a prominent Lachute merchant—was born in Lachute and educated in Lachute Academy. He went overseas in May, 1915, with the McGill Hospital, under Col. Birckett, C.B., and, after some months' service at Boulogne, returned to McGill in January, 1916, to complete his studies in medicine. On being graduated in July, 1916, he joined the Royal Army Medical Corps, and went overseas in September. On his arrival at the front he was attached to one of the Imperial infantry regiments as medical officer, and had been in the firing line continuously until wounded. At that time he held the rank of lieutenant, but has since been promoted.

ECONOMICS CLUB TO ORGANIZE.
All those interested in the Economics Club are requested to meet in the Smoking Room of the Arts Building on Monday, October 15th, at 4.00 p.m., sharp.

HARVARD TO PLAY SAILORS.

Harvard's informal varsity football eleven will play its first game in the Stadium, Soldiers' Field, next Saturday afternoon, when it meets an eleven composed of sailors from Bunkin Island. This team has a number of former college stars in its lineup, and will no doubt give the Crimson fine competition. Several other games have been arranged for the Crimson with military and naval teams.

WHAT'S ON.

TO-DAY.
2.00 p.m.—Interclass Sports.
4.30 p.m.—C.O.T.C. Parade.

COMING.
Oct. 14.—Maccabean Circle meets in Royal Arcanum Chambers at 2.30 p.m.
Oct. 15.—Arts Undergrad Society, 12.45 p.m.
Oct. 15.—Mandolin Club, 7.45 p.m.
Oct. 16.—Cercle Francals, 4.00 p.m.
Oct. 19.—University Sports.

MEDICAL SOCIETY MET LAST NIGHT

Med. Heard Fine Talk by Acting-Dean Blackader.

The meeting of the Medical Undergraduates' Society held in the New Medical Building, last night, was a well-attended one, about one hundred and thirty men being present. After the routine business was disposed of, Acting-Dean Blackader gave an informal talk to the students.

The president, in introducing Dr. Blackader, made mention of the affectionate name of "Daddy" given him by the members of the Society.

Dr. Blackader stated that he appreciated the nickname highly, and that while they could think of him as a training "daddy," they could not expect him to foot bills. He showed optimism concerning the record of the term, and gave it as his opinion that students should aim not merely to pass, but to pass with honours. Addressing the Senior Meds., the speaker said that they should graduate competent to practise medicine. Students must be thinkers, and seers, not mere listeners, and absorbers of facts. Regarding the Medical Society, Dr. Blackader thought it should be even more for recreation than for the study of Medicine. Papers in medical subjects should be bright and breezy.

The speaker suggested two members co-operating in synopsizing editorials of the Journals of the American and British Medical Associations bearing on recent advances in different branches of medicine.

A medical man, went on the Dean, who merely absorbs knowledge, is a fool. To fill his place in society he must keep in touch with the world through magazines, and good literature. Dr. Blackader touched on the honour and glory won by McGill overseas, and said he was proud he was a McGill man. He advised the men to put their whole force into their studies and hold up the honour of the college, and of Canada in coming years.

Mr. Britton, at the conclusion of the address, moved a vote of thanks to Dr. Blackader, which was seconded by Mr. Donnelly. Mr. Hornbeck then gave a solo, which was encored.

Refreshments were served, and a case report took place at which eleven diagnoses were made, Mr. Bloomberg's being the most correct.

"God Save the King" was then sung and the meeting broke up.

H. M. ROSCOE, SCI. '18, ELECTED TO COUNCIL.

H. M. Roscoe was yesterday elected, by acclamation, to fill the position of representative of the Science Undergraduates on the Students' Council. This position was made vacant by the non-return to college of W. H. Schiedel. Mr. Roscoe will complete the term of office for which Mr. Schiedel was elected, namely, till the end of December.

Following is a list of the names attached to the nomination paper:
F. L. Cann, H. C. Lee, T. J. C. Heney, E. W. Camp, H. R. Dorken, H. Mouquin, L. Jordan, J. A. Dionne, A. A. Wallace, J. L. Patterson, T. J. J. Fox, W. M. McCutcheon, J. N. Betourney, H. J. de Montague, H. McLelland, S. G. Pitt, C. C. Butman, S. J. Standish, R. H. Potter, H. Thompson, W. C. Lortett, T. J. Code, J. Doran.

LIEUT. R. BRANCH WOUNDED.

News has been received by the parents of Lieut. R. Branch, Arts '18, Durham Light Infantry, that he was severely wounded on Sept. 23rd by gunshot in the left shoulder. He was admitted to No. 1 Red Cross Hospital, Leonquet, Sept. 24th, 1917. He is a brother of G. A. Branch, of Med. '19.

ARTS UNDERGRAD MEETING.

The meeting of the Arts Undergraduate Society, which was scheduled for 12 noon on Monday, Oct. 15th, has been changed to 12.45 p.m., the Dean having kindly consented to dismiss lectures 15 minutes before the hour.

GR. A. M. CROSS WRITES ABOUT BATTERY DRAFT

Arts '19 Man Describes Experiences in England.

HAD LONG QUARANTINE.

Tent-full of Arts Men Suffers Lengthy Confinement.

Dear —: You may possibly have heard that the McGill Siege Artillery Draft is now No. 13 Canadian Siege Battery. I'll try to trace out the ups and downs in our career up to the present time.

As you know, we arrived in England on July 4th. We went direct to the segregation camp at Otterpool, where we enjoyed a ten days' sojourn. It was during our stay there that we first began to realize what we were in for. Reveille at 5 a.m., was somewhat different from what we had known at the Union, 6.30 a.m. It was really 4 a.m., you know, as the Day-light Saving Scheme is in force here. The whole day was spent at drill, P.T., route marches, etc., with very little time off. However, we soon became used to it all, as several thousand Canadian artillerymen had done before us.

After ten days at Otterpool, the Draft moved down to Ribbors Barracks, Shorncliffe. There it was absorbed into "C" Battery, 2nd Battery, Canadian Reserve Artillery. It looked as though the boys were to be split up, separated, and sent over to France in groups. In the end, however, the good news came through, that we were to be formed into the 13th Canadian Siege Battery. You can imagine how elated we were! Major Geary, who has seen service in France, and made a name for himself, too, became our O.C., with our old officers as the subordinates.

Two weeks ago we left Shorncliffe and came to Witley, where you now find us. So you have a rough sketch of our movements up-to-date.

As to my own doings, they have been quite interesting; at least, so it seems to me. At Otterpool, the boys in our tent are as follows: "Funch" Fowler, Arts '17; Gordon Heslam, Arts '18; Gordon McLellan, Comm. '17; MacFarlane, Joseph, and myself, of Arts '17; McLennan, of Arts '18, and Roy, of Arts '20. Well, that tent-full of beauties has certainly come in for some pretty rough handling.

On the last day at Otterpool, Heslam was taken with the measles, and had to go to the hospital. Previous to this Roy had also been obliged to leave us owing to an attack of hay-fever.

When the draft left for Shorncliffe the six of us were sentenced to stay behind in quarantine, for a term of 16 days. Well, we did our time and were waiting for orders to join the other fellows, when I gave signs of the measles. The consequence was that I was taken off to the hospital and the five other fellows were doomed to 16 days more in quarantine.

I enjoyed myself very much in the hospital, I can assure you. The meals were great, the sisters very kind, and the whole day to be spent at nothing at all. The hospital overlooks the English Channel, and I spent most of my time lying on the lawn in front, watching the manoeuvres of ships, aeroplanes, submarines, etc., out in the Channel.

It was good to get back into harness once again, however, and we are now progressing slowly but surely, towards becoming trained men.

England, at first sight, appeared to most of us as a sort of little toy country. Everything is so orderly and regular, as though laid out by someone playing with blocks. The country around here, however, is more wild and woody, reminding one somewhat of the Laurentian district. For my part, I like the situation very well indeed.

Owing to my stay in hospital I have not yet had my landing leave. We expect to move from here soon, and as soon as we become settled in our new camp I shall apply for it.

I guess there will be very little "doing" at McGill this winter; what do you say? You will, no doubt, be busy on; until they, I'll not commit myself. Every chap who went there, in other words, every man in the Battery, enjoyed himself immensely.

I feel very sorry to lose the companionship of my friends in Arts '19 for the rest of my college course, but will no doubt be able to meet others when I return.

My candle is swimming in its own remains, so I must close.

Your old friend,
MORREY CROSS.

ABILITY TO DISCRIMINATE.

After two weeks of College life the average Freshman has, to a certain extent at least, become adapted to his new state and environment. He has acquired a degree of confidence in himself, and has in a measure submerged the primeval sensations so often attributed to the proverbial "fish out of water." In short, he begins to feel himself a part of the University.

Perhaps he is already engrossed in his studies, and oblivious to aught else. Or more probably he may be idly revelling in his new state of unaccustomed freedom and independence which is such a vivid contrast to the rigid discipline of the bygone "prep." school days. These two courses are equally possible, and both are more or less probable.

The majority of Freshman on entering the University finds that he has stepped into an entirely new and unsuspectedly different realm. Pleasure, study and social duties crowd about him, each attractive in its novelty, and each more or less worthy of his indulgence. The First Year man, therefore, finds himself faced with a new, and for the moment, perplexing problem of wisely and discriminatingly apportioning his time and activity. For perhaps the first time he must practice self-reliance—must independently map his destiny.

At first—and quite naturally so—the path is obscure and vaguely defined; a maze of activities, studies, pleasures and insistent demands.

At this point the Freshman is—being for the moment dazzled by the multitudinous and attractive by-ways—liable to lose sight of the main issue—and dash hither and thither in a vain endeavour to participate in everything. This may be regarded as the predominately undesirable tendency of Freshmen. However, it is by no means immune to exception.

Another type is the man who enters the University imbued with a sole determination to succeed academically. He confines his efforts and time entirely to studying and manifests no interest in student activities, from which he consequently derives small benefit.

We will not attempt to point out any pre-eminence or preference of one of the above-mentioned types over the other, but will with one decisive stroke brand them both as foolhardy and inefficient.

The secret of an undergraduate's success is to acquire the faculty of intelligently discriminating—the ability to strike the happy medium between academic activity and participation in other endeavours and indulgences—the knack of knowing what and to what extent, college activities may be indulged in without mortgaging the future.

EDITORIAL NOTE.

In another part of to-day's "Daily" there is inserted a notice of a meeting of the Mandolin Club. This club, which has always been one of the most flourishing about the University, offers an opening for those men who possess musical ability. 'One of the first questions that arose in our mind on reading the notice was "What about a Glee Club?" It seems a strange thing that in a large college like McGill where there must naturally be many men who possess enough talent to sing a college song in tune, that it should be impossible to find a student of sufficient initiative to revive the Glee Club, an organization that in other colleges holds a place of importance second to none. The attempt last year to start a Routers' Club, while entirely successful for the time being, needs to be followed up by a sustained effort this year to keep this valuable activity alive. A Glee Club organized now, in connection with the Mandolin Club, would be well trained by the time the Hockey Schedule began, to act as a Routers' Club, and the chance should not be let slip.

TO ESTABLISH UNION.

At a meeting held in New York last June, plans were considered for the founding of an American University Union in Europe, to be located in Paris, with branches in London and other cities. The object of the Union when it is established, will be to provide a club for the use of American college men who are abroad, in the service of the Allies, and also to furnish an information bureau, where the colleges, the relatives, and the friends of those engaged in the war, may get news of them. All casualties will be reported there.

Delegates from 15 leading colleges and universities attended the meeting in New York, which was called by Secretary Slovik, of Yale. Since that time 18 more have signified their intention of joining the Union. The institution is to be financed by these college memberships, and by club memberships. The fees for universities are to be graded according to size. Institutions with an enrollment of over 10,000 pay \$500, those between 5,000 and 10,000, \$250; and all less than 5,000 are to pay \$100. Club memberships will also cost \$100, and it is hoped that a large number of University Clubs will join. Payment of dues by a college or a club entitles all members to the use of the Union.

WELL! WHAT ABOUT IT?

An airman, travelling at the rate of about twenty-eight meters a second would reach the moon after a continuous flight of five months, but would have to be on the wing 5,800 years in order to get to the evening star, and would need no less than 17,000 years for the journey if he set out to pay a visit to the sun. A ray of light, on the other hand, with a speed of 300,000 kilometers per second, would reach the sun in about eight and one third minutes, and the moon in one and a quarter seconds. It would take four hours, however, to reach Neptune, the planet farthest from the earth, and a journey to the most distant part of the Milky Way would take 16,000 years, while a shell fired from the earth would require more than three milliards of years to accomplish the distance.

abroad. Honorary memberships have been given to the United States Military Academy at West Point, and to the Naval Academy at Annapolis. Two members of the University Faculty are officers of the institution, Professor H. D. Thompson was elected treasurer of the Union, and Professor Paul van Dyke is associate director of the committee in charge of the affairs of the Union in Paris.

MINING SOCIETY MET TO HOLD ELECTIONS

First Regular Meeting to be on Tuesday, October 16th.

The annual meeting of the society was held yesterday in the Mining Department. This meeting is normally scheduled for the latter part of March, but owing to the fact that the President and several members of the society had at that time enlisted in the Royal Canadian Mounted Police, the meeting was held at this time.

Yesterday's meeting was a purely informal gathering of the Third and Fourth Year Miners and Chemists for the election of officers. Dr. Porter, Honorary President, took the chair, and asked for nominations.

The following men were nominated and later elected by acclamation:—President, H. M. Roscoe; vice-president, H. C. Lee; secretary-treasurer, D. J. Beach.

Dr. Porter then resigned the chair to the new President and the meeting re-elected Dr. Porter Honorary President, and then adjourned.

The McGill Mining Society this year aims to hold a series of meetings addressed by prominent Canadian mining engineers, and thus affords an opportunity for students of the first two years to become familiar with the Canadian Mining Industry and its significance in wartime. The Society is the Student Branch of the Canadian Mining Institute, and Montreal members of this organization will be welcome at the meetings.

The first regular meeting of the Society will be held in Dr. Porter's lecture room next Tuesday evening, October 16th, at eight o'clock, when the Society will be addressed by Mr. J. T. K. Crossfield, a 1913 McGill miner, who has just returned from South America and has been accepted in the Royal Flying Corps.

Mr. Crossfield has spent the last four years in Chili and Peru, and has had exceptional opportunities to familiarize himself with mining conditions there, and especially with work at great altitudes. He has also been a close observer of men and affairs, and will have something to say about the political and business methods of the people and their attitude toward the war.

Mr. Crossfield's address will take the form of a general account of his experiences, and although it will be primarily addressed to men engaged in mining it will prove almost equally interesting to others, and the meeting will therefore be open to students of all courses and faculties.

RESULTS OF APPLIED SCIENCE SUMMER WORK.

The results of the Second Year Survey Camp held at St. Anne's last month have been issued by the Faculty of Applied Science. The results of third year Summer Reading and of Third Year Electrical and Mechanical Engineering Summer School have also been issued. The lists follow:

SURVEYING FIELD WORK—SECOND YEAR.

Class I.—Cunningham; Calkin and Schippl (equal).
Class II.—Dunbar; Dewar and Edwards (equal); Goodman and Wiggs (equal); Jue, Hannan and Muir and Powell (equal); Lyman, Cloutier and Deneau (equal); Henry, Cromwell and Farnsworth and Labell and Perriton (equal); Hart and Lafontaine and Windsor (equal); Thomson, Gibbs and Macdonald (equal).
Class III.—Larose, Elder, Malone.

SUMMER READING—THIRD YEAR.

Class I.—None.
Class II.—Brennen, H. J. Lamontagne, Lawrence, Whelen.
Class III.—Boutin, Kirk, Brennen, J. H. Amdur, Walker.

MECHANICAL DRAWING—THIRD YEAR.

(Summer School.)
Class I.—None.
Class II.—None.
Class III.—Thompson, Standish, Patten, Louttit, Code.

PHYSICS—THIRD YEAR.

(Summer School.)
Class I.—None.
Class II.—Thompson.
Class III.—Code, Patten, Louttit, Standish.

SHOPWORK—THIRD YEAR.

(Summer School.)
Class I.—None.
Class II.—Louttit, Patten, Code, Standish, Thompson.
Class III.—Walker.

WATER POLO TEAM.

There will be a practice of the Water Polo team this afternoon at 4.30 at the Y. M. C. A. baths. All members of the team are urged to turn out, and to remember that it is necessary for them to be medically examined by Dr. Harvey before taking part.

BATTALION ORDERS, NO. 3.

by
Lieut.-Col. Robert Starke,
O.C., McGill University Cont.,
C.O.T.C.

October 12th, 1917.

PARADE.—In order that the students may have an opportunity to attend the Freshmen-Sophomore sports, the parade of Saturday, October 13th, for "A" and "B" Companies will fall in on the Campus at 4.30 sharp, and will be dismissed at 6 p.m.

The parade will be called to attention at 4.30 exactly, and attendance will only be granted to men who are then present.

J. C. SIMPSON, Captain.

Adjutant, McGill Contingent, C.O.T.C.

R. V. C. NOTES.

It is hoped that a good number of students will be able to go out to MacDonald College to-day, with the tennis players, to watch the games. A list has been posted on the notice-board, and all House Girls who intend going are requested to sign their names before 9 o'clock this morning. The players will leave the R.V.C. punctually at 1 p.m. The match is to consist of one doubles and three singles. Miss E. Hay and Miss Q. Savage will uphold the R.V.C. in doubles, and Misses M. Muir, E. Abbott and L. Fowler in singles.

It was the time when the Southern story, "The Kentucky Cardinal," was all the craze. A lady walked into a Broadway book store and languidly requested the alert looking young clerk for "one of the latest books, if you please."

"Ah, Madame, you could not find anything better than this," handing her a copy of "The Kentucky Cardinal." "Thank you, I am not interested in Theology," replied the lady indifferently. "But, Madame, this cardinal was a bird," argued the zealous clerk. "That does not make me any more inclined to purchase it, thank you," said the lady, and withdrew with an air of offended dignity.

COLLEGE REFLECTIONS.

1st Day:
Weary and hard are the long years of college.
Years when we're working with might and main,
Striving to climb up the steep hill of knowledge,
Trying a place on its great heights to gain.

Many and long are the labours before us,
Heavy the burdens of work to be borne;
Hopelessness with its dark visage creeps o'er us,
Laughing our poor feeble efforts to scorn.

The dawn of bright morning, no gladness can bring us,
But rather a feeling of hopeless regret,
And we sigh as this thought in our sad hearts there lingers,
"Oh, give the night, when we can but forget."

2nd Day:
Joyous and gay are the short years of college,
Years when we're playing with might and with main,
Walking with laughter the bright fields of knowledge,
Striving the greatest of pleasures to gain.

Many and great do the joys lie before us,
Welcome are duties that come with the day;
Life brings for us nothing sad and desponding,
Life gives us only the joyful and gay.

We welcome the sunshine of each happy morning,
With anticipation we look to the day;
While our hearts in glad union, all sorrow scorning,
Say, "We love the sweet daylight when night's gone away."

The difference all lies in how we regard life,
For sometimes we love it, and sometimes we hate,
When everything pleases, there's nothing that's like it,
When everything's wrong our depression is great.

NOMINATIONS FOR HOCKEY CLUB.

Nominations for the Presidency of the Hockey Club will close on Monday next, October 15th, at 5 p.m. Papers must be signed by 25 students, and be handed to the Secretary of the Students' Council before the time specified above.

UNCLAIMED LETTERS.

List of unclaimed letters in the Registrar's Office:
Brennan, C. U.
Brunette, J.
Davison, Frank C.
Hamilton, P. D. P.
Loughheed, Norman.
Macdonald, Edward M.
McGlen, H. B.
Morrison, J. B.
Russell, John.
Saunders, L. (Capt. No. 122 McGill Rifle Assn.).
Twenny, Herbert.

The Registrar would be glad if students, or others, who know the present address of any of the above named would notify him of same. Registrar's Office, Oct. 11th, 1917.

BRITISH RED CROSS TO HOLD COLLECTION

Joint Committee Will Make Effort on October 18.

The following circular has come to hand descriptive of the work of the St. John Ambulance Association, in conjunction with the British Red Cross Society. Nothing can be added to the statement of the activities of the Red Cross except to say that no better opportunity of giving money where it will do the most good could be wished for than the collection on Thursday, October the eighteenth. Once again the earnest attention of all centres of the Canadian Branch is directed to the proposed collection in aid of the Joint Committee of the British Red Cross Society, and the order of St. John—briefly designated as the "British Red Cross"—on Thursday, October 18th. This particular date is to be "Our Day."

The prolongation of the war involves continuous increase in the work of the British Red Cross in every theatre of the war that is being carried on in three continents. Apart from the record of the glorious achievements of British arms, the historian of the future will have much to say about what the British Red Cross has accomplished during the great war. Here are some facts about the work of the Joint Committee.

Abroad.

2,500 Motor Ambulances, cars, cycles, wagons, and soup-kitchens sent abroad.
\$5,500,000 for purchase and upkeep of motors.
4 Hospital Trains running in France, each carrying 450 wounded, have cost over \$300,000 to build and run.
\$125,000 to French Red Cross Society.
\$2,750,000 spent on work in France and Belgium.
\$2,750,000 spent on work in Mesopotamia, India, Egypt, Salonika, Malta, and the Near East.

The Hospital Ship "Nabha" sent to Mesopotamia.
65 Motor Launches sent to Mesopotamia, Egypt, East Africa and Malta.
22 Hospitals and Convalescent Homes in France, Egypt, Malta and Salonika.

\$200,000 spent on building and equipping St. John Brigade Hospital, Etampes, France (520 beds), and \$250,000 spent on equipment and maintenance.

\$50,000 to erect, equip and maintain recreation and refreshment rooms in France.
7 Rest Stations in France for wounded men en route, as well as hostels for relatives visiting wounded, and rest homes for nurses.

16 Store Depots for hospital necessities, etc.
12 Branch Offices for Enquiries for wounded and missing.
\$175,000 spent on work in Italy.
\$150,000 spent on work in East Africa.

\$300,000 spent on work in Serbia and Montenegro.
\$350,000 spent on work in Rumania.
\$100,000 spent on work in Russia.
\$8,000,000 spent on Surgical Dressings, hospital equipment, necessities and comforts of all kinds despatched mainly abroad.

6,000,000 articles of Clothing and Bedding and Hospital Furniture and Equipment sent away, mainly abroad.
416,383 Parcels of Food and Clothing sent from London to British Prisoners of War in enemy countries.

Invalid kitchens attached to Hospitals in Malta, Salonika and Egypt.
Buffets, soup shelters, bathing sheds, recreation and tea rooms for wounded and convalescent men, established in Egypt, Malta and Salonika.

6,500 Surgeons, Nurses, V.A.D.'s, stretcher bearers, hospital orderlies and ambulance drivers now serving abroad.

180 Women Ambulance Drivers serving abroad.

In The Motherland.
67,000 Hospital Beds established in the United Kingdom.
30,000 of these provided with the Nursing Staff.

2,000 Trained Nurses working at home and abroad.
7,500 V.A.D.'s helping in the Army Hospitals.

\$25,000 spent on equipment of King George Hospital (1,850 beds), and \$125,000 a year contributed to cost of its maintenance.
\$225,000 spent on building and equipping Netley Red Cross Hospital (1,000 beds); and \$600,000 spent on maintenance.

\$175,000 for Orthopaedic Curative Workshops and Training Fund.
\$175,000 for Facial Injury Hospitals.

\$100,000 for initial outfit in providing and equipping after-care institutions for totally disabled men.
\$100,000 for materials for Red Cross Working Parties.

40,000 books and magazines supplied weekly for the sick and wounded.
460 Motor Ambulances, Cars, etc., vice.

28 Command Depots and Convalescent Camps regularly visited and supplied with Comforts and Games.
The British Red Cross work costs over \$250,000 per week, or \$25.00 per minute.

COACH EUSTICE CALLED TO AIR SERVICE.

Coach Eustice, who has been guiding the fortunes of the New York University football eleven since the beginning of the season, has been called to the aviation service of the United States.

CERCLE FRANCAIS.

A meeting of the executive of the Cercle Francais will be held in the Arts Building at 4 o p.m. on Tuesday, Oct. 16th.

MANY HARVARD MEN ON WAR SERVICE

Athletics, Examinations, All Overhauled by Preparation for War Service.

"The war has captured Harvard, and the terms of surrender have been unconditional," says the Harvard Alumni Bulletin, in explaining how all things, from athletics, even football, to examinations, have been overhauled in the interest of the Harvard undergraduate by the zeal of preparation for the service of the nation.

There are two courses offered in military instruction this year. One of these is for men without previous experience; the other is intended for men who have had the groundwork of military science and takes up advanced subjects in modern tactics of warfare. Both aim to prepare for ultimate commissions in the army, and both will be under the direction of Colonel Azan, an officer in the French Army, detailed at Cambridge for that special purpose.

It is not known how many Harvard men are actually in the service of the country at the present time, for of course, nothing like complete statistics have as yet been compiled, but from the material on the subject that is available, about 4,750 Harvard graduates and undergraduates are known to have enlisted in one branch or another before August, 1917. It is supposed that many thousands of others are actually in government service, of whom there are no definite records at hand. The 4,750 men are scattered in the different services as follows:

United States Army 1,696
Harvard I. O. T. C. and other military bodies 847
Foreign Armies 113
Medical Service 670
Red Cross and other relief Ambulance Service 520
National, State, and other committee work 243
Miscellaneous 107
Total 4,750

PROVINCE OF QUEBEC

DEPARTMENT OF COLONIZATION, MINES AND FISHERIES.
The chief minerals of the Province of Quebec are Asbestos, Chromite, Copper, Iron, Gold, Molybdenite, Phosphate, Mica, Graphite, Ornamental and Building Stone, Clays, Etc.

The Mining Law gives absolute security of Title and is very favourable to the Prospector.

First of all, obtain a miner's certificate, from the Department in Quebec or from the nearest agent. The price of this certificate is \$10.00, and it is valid until the first of January following. This certificate gives the right to prospect on public lands and on private lands, on which the mineral rights belong to the Crown.

The holder of this certificate may stake mining claims to the extent of 20 acres.
During the first six months following the staking of the claim, work on it must be performed to the extent of at least twenty-five days of eight hours.
SIX MONTHS AFTER STAKING.

At the expiration of six months from the date of the staking, the prospector, to retain his rights, must take out a mining license.
MINING LICENSE.

The mining license may cover 40 to 200 acres in unsurveyed territory. The price of this license is Fifty Cents an acre per year, and a fee of \$10.00 on issue. It is valid for one year, and is renewable on the same terms, on producing an affidavit that during the year work has been performed to the extent of at least twenty-five days' labor on each forty acres.

MINING CONCESSION.
Notwithstanding the above, a mining concession may be acquired at any time at the rate of \$5.00 an acre for SUPERIOR METALS, and \$3.00 an acre for INFERIOR MINERALS.

The attention of prospectors is specially called to the territory in the North-Western part of the Province of Quebec, north of the height of land where important mineralized belts are known to exist.

PROVINCIAL LABORATORY.
Special arrangements have been made with the POLYTECHNIC SCHOOL of LAVAL UNIVERSITY, 228 ST. DENIS STREET, MONTREAL, for the analysis of minerals at very reduced rates for the benefit of miners and prospectors in the Province of Quebec. The well equipped laboratories of this institution and its trained chemists ensure results of undoubted integrity and reliability.

The Bureau of Mines at Quebec will give all the information desired in connection with the mines and mineral resources of the Province, on application addressed to
HONORE MERCIER,
Minister of Colonization, Mines and Fisheries, Quebec

FRESHMEN TO PLAY.
NEW HAVEN, Conn. — The uncertainty which has hung over Yale football was dispelled Wednesday by the definite announcement that freshman games would be arranged with Harvard and Princeton.
The chairman was given the power to enforce the restriction that only men enrolled in military or naval training be allowed to represent Yale.

NEW YORK RESUMES.
It was also decided that class elevens should be organized and a series of interclass games played, beginning next Saturday.
New York University's football squad resumed work on Wednesday afternoon, after a rest of two days. Frank Wall, who is assistant physical instructor at the University Heights institution, was in charge.

PUT BAN ON FOOTBALL.

The Princeton Board of Athletics held a special meeting recently, in which it was decided not to resume intercollegiate football this year. The board will, however, sanction such minor sports as can prove themselves self-supporting, but their schedules must first be approved.

The meeting was held in the Athletic Association Offices, and was called on account of the dissatisfaction caused by the dropping of Varsity football. After careful consideration the board deemed it necessary to sustain the resolution passed last spring. Many reasons united in causing this decision, the war being the chief one.

No plan similar to that of Harvard, which has an informal University team, was considered, as this was thought too much like regular Varsity football.

Many of the colleges and universities have teams, but in most cases they are kept because they are thought an essential part of the military programme.

The Board, while recognizing the importance of modified athletics in

MANDOLIN PLAYERS.

A short meeting will be held on Monday, Oct. 15th, at 7.45 p.m., sharp, in the Band Room of the Union (top floor), to consider the advisability of continuing the work of the Mandolin Club through the coming season.

All last year's players and any men who can play the mandolin are requested to be present at this meeting.

If the attendance is sufficient, and the decision is to continue the manner and personnel of management will be decided on.

Remember, all mandolin players, 7.45, Monday, at the Union. Come and bring any other players you know.

military training, considered that a Varsity football team would be of too great importance in the college life at this period.

QUIPS

UNCLE SALT BASIN — SHOOTING THE PINK.

The years have flown by with their sunshine and showers, my college term's passing as quick as a wink, and I often sit pondering over the hours I've spent in the billiard-room, shooting the pink. Oh! of joys and pleasures of conversat., dancing or rink, but none like the rapture of waving a cue around, up in the billiard-room, shooting the pink. I once knew a chicken I loved to distraction, as slangy ones have it, she sure was some looker; her image made way for a stronger attraction—no matter how cute they are, girls can't play snooker! 'Tis the pink, 'tis the pink that my whole heart entrances, (the colour in fashion this season, I hear) and where is the dame whose tea-parties or dances could ever with this a comparison bear?

'Tis game's on the pink, boys, I cast care behind me, let fusing and lectures all go on the blink; and when you would see me 'tis there you will find me—up in the billiard-room, shooting the pink!

CASUAL CLARENCE.

He answers any question you like to put.

TO-DAY'S PERPETRATION.

Ques.: Why is a straw hat so light on the head?

Ans.: 'Cause it isn't felt!

SOUPERS.

Oh, I once met a chicken—(Observe the plot thicken; But can your suspicions, you goop, For the chicken, I mean, Floated in a tureen, Of good old home-made chicken soup!)

ANSWERS TO CORRESPONDENTS. Dear Iva.—What will stop falling hair, please? I am very much worried about mine.

D. SPONDENT.

Dear D.—The floor.

"IVA PAYNE."

PUTTY-EYED PERCIVAL SAYS Ain't it funny that in the library talking's allowed if it's not aloud, but if it's aloud it's not allowed?

Scientists say that no two leaves in a forest are exactly alike—and yet they all come from the same leafy mould.

DAY-DREAMS!

THU. was a young weekling who wanted TUE WED. But he simply had not any MON. And the queen had other fish to FRI, she said, So he went and SAT in the SUN. AYE SEN.

POET SCORNER.

Edited by Pyrotechnic Pete and Anna Nyas.

In spite of our earnest appeal made last week, there has been a regrettable lack of contributions on the part of our readers. One might almost say that they have shown an over great coyness in presenting their effusions to the kindly criticism of our staff. This will never do. How is the keen-bled intellect of the critic to be whetted save upon the grindstones of the would-be poet's mentality or polished off save upon the leathery products of that mentality? Do not, I pray you, be bashful in submitting your attempts; remember that they are ludicrous, even if all the jokes fall flat. The flatter they fall, the funnier they will appear to the rest of

our readers.

We have below a pretty little lyric by an unknown pen, which we are sure will delight all who read it—the sentiment being peculiarly exquisite. After it comes a curious attempt, of which the only part we can understand is the last line. Can you do better?

The freshets of spring Are a terrible thing; But I think it's admitted by all, That the freshets seen there, Can in no wise compare With the freshettes we see in the fall!

FUNNY, ISN'T IT?

He "lammed" the door and he "ran down" the stairs, He "took" off his cap and he laughed at all cares, He "pasted" some stamps and "licked" envelopes, He "turned down" the light, and yet the boob hopes To live on in peace, till he's "killed" enough time, But you don't comprehend, so I'll finish my rhyme.

WHO

Was the Presbyterian Theological student who made such a hit in front of the notice-board in the Arts Building yesterday morning?

WHO

Was the R.V.C. student who exclaimed so sadly, the other day, "He doesn't recognise me!"

WHO

Were the Freshettes who found such a fitting subject for eulogy on the Campus recently?

WHO

Was the theolog. who lost a large quantity of fruit, which he brought from the country, and found it in the room of a Prof.?

WHC

Was the Theolog. who once asked his Prof. if the Hebrew Bible was written in Greek?

WHO

Was the Theolog. who asked the matriculation Tutor what Epsilon meant in the Greek? Is it true that he won the Greek prize in his college that year?

WHO

Was the Fourth Year Medicine student who asked at a well-known private residence, "Is this a Rooming House?" and when the maid answered to the effect that it was not, remarked, "This is a boarding-house, then!"

WHO

Is the Fifth Year Med. who takes a nightly stroll on Pine Ave? Does he go alone?

WHO

Was the Freshman who enjoyed himself so much at that table in the Library on Wednesday afternoon at 3 o'clock?

WHO

Was the Fifth Year Med. who was seen motoring Wednesday night?

WHO

Was with him?

WHO

Were the Science Sophs. and Med. Juniors who were so interested in the cyclists in front of Strathcona Hall on Tuesday afternoon?

WHO

Were the two Freshettes who were so quick at responding to the smiles of a student standing on the steps of the Engineering Building on Wednesday morning?

And the one who waved?"

WHO

Was the Senior Med. who initiated two friends into the mysteries of the flowing bowl the other day?

WHO

Were the friends?

WHO

Were the Freshies who walked up to a couple of Sophs. in the Hall to ask if they were the ones who had thrown water on them the night before? Why did they claim to be Sophs.?

WHO

Is the Theolog. who states he can preach more inspiring sermons of late? Is it because he takes a girl with him to the "Kirk"?

WHO

Is the Theolog. who was lost in the country last week, and failed to appear at his appointment? Why?

WHO

Is the Prof. who needs a new gown very badly?

AND WHO

Is the one who has secured a new one?

WHO

Was the fat Freshman who wore his uniform to drill on Tuesday afternoon? Wasn't he a trifle lonesome to be the only one to have the manly garb on his large self?

WHO

Is the Associate Editor who believes in paper economy; as shown by his painstakingly clipping the pieces of copy paper to fit the items?

WHO

Was the Arts Freshman who had the nerve to hold a fifteen minute conversation with a Second Year Donald in front of the Arts Building?

WHO

Were the Sophs. who tried to make him realize that he was taking undue privileges?

Were the two Freshmen who started to walk out of the Union without settling for the pool table they had been using for an hour.

WHO

Is the happy student who at the Summer Readings exam, discoursed at length on a certain individual named Trafalgar, who won the battle of Waterloo?

SENIOR vs. FRESHIE.

Freshie: "I need \$5 for my caution money, and I have only got four." Senior: "That's easy. Pawn the \$4 for three, and sell the pawn ticket for \$2."

THE MOTIVE.

Recruiting Officer: "Think of the thousands that have gone to fight for king and country. What are the motives that take these brave men?" Pacifist speaker: "Locomotives, of course."

VERDANT MED. EMBRYO A PROMISING "ASKLIPOS"

Laboured a Whole Day Getting Valuable Information.

Carefully Copied all notices and time tables, and intended to attend opening Fourth Year lecture on Medical Jurisprudence.

An over-sealous and a very fresh-looking young Medical Freshman was observed by one of our ever watchful Daily reporters last Wednesday, at 8.45 a.m., standing in front of the notice-boards in the main hall of the New Medical Building. The embryo doctor was busily engaged in transcribing the directions on the First Year notice-board. On close inspection our keen-eyed reporter observed that the verdant Freshman had literally copied everything on the notice-board, including a summons to one of the Freshmen. Not content with his excellent word for word transcription, the young apostle of "thoroughness," moved on to the Second and Third Year notice-boards, and wrote down their contents with a keen look of satisfaction. Hungering for a deeper insight into the mystic and ever-attractive realms of medicine, the nebulous physician, accompanied by the dazed and suspicious reporter, moved on to the Fourth Year notice-board. His attention was instantly riveted to a small notice advising the Juniors of a lecture in ———. With a satisfied look of complacency the ever-verdant cherub devoured its contents and dealt with the Fifth Year notice-board in the same thorough manner. The hour-hand had by this time swung around to 11 o'clock, and the great hall was deserted.

Fairly dazzled by the importance of the medical profession, as evidenced by the long and imposing array of lectures, which he had copied into his voluminous note-book, our glowing and enthusiastic Freshman hied himself to the sacred precincts of Miss Brandt's office, the ever useful and jolly secretary of the Registrar, Dr. Scane. With scarcely a moment of bashful hesitation, our "ever-green" Freshman plunged into an animated conversation with Miss Brandt on the advisability of eliminating some of the "heart-breakers" of the First and Second Years, such as Physics and Organic Chemistry. Finding it impossible to soften her heart, our disgruntled Freshie threatened to communicate with the Dean, and hastily withdrew. At 5.45 that afternoon the unique resemblance of the ever-green tree rushed into Miss Brandt's office again, and enquired where the first lecture in medical jurisprudence was being held that evening.

Satiated by this time by his intense ignorance, our patient secretary disillusioned him, whereupon the abashed and shame-faced Freshman turned about and fled.

The Royal Military College of Canada.

THERE are few national institutions of more value and interest to the country than the Royal Military College of Canada. Notwithstanding this, its object and the work it is accomplishing are not sufficiently understood by the general public.

The College is a Government Institution, designed primarily for the purpose of giving instructions in all branches of military science to Cadets and Officers of the Canadian Militia. In fact, it corresponds to Woolwich and Sandhurst.

The Commandant and military instructors are all officers on the active list of the Imperial army, lent for the purpose, and there is in addition a complete staff of professors for the civil subjects which form such an important part of the College course. Medical attendance is also provided.

Whilst the College is organized on a strictly military basis the cadets receive a practical and scientific training in subjects essential to a sound modern education.

The course includes a thorough grounding in Mathematics, Civil Engineering, Surveying, Physics, Chemistry, French and English.

The strict discipline maintained at the College is one of the most valuable features of the course, and in addition, the constant practice of gymnastics, drills and outdoor exercises of all kinds, ensures health and excellent physical condition.

Commissions in all branches of the Imperial service and Canadian Permanent Force are offered annually.

The diploma of graduation is considered by the authorities conducting the examination for Dominion Land Surveyor to be equivalent to a university degree, and by the Regulations of the Law Society of Ontario, it obtains the same exemptions as a B.A. degree.

The length of the course is three years in three terms of 9½ months each.

The total cost of the course, including board, uniform, instructional material, and all extras is about \$300. The annual competitive examination for admission to the College, takes place in May of each year, at the headquarters of the several military districts.

For full particulars regarding this examination and for any other information, application should be made to the secretary of the Militia Council, Ottawa, Ont., or to the Commandant, Royal Military College, Kingston, Ont.

Medical Boards are Ready!

Medical Boards are now ready to examine all men who apply as to their physical fitness for military service. These boards are established throughout this district.

Upon examination, the Medical Board will classify each applicant according to his fitness; into Category A if he is fit for service in overseas fighting units; Category B if fit for service overseas in Army Medical Corps, Forestry Battalions, etc.; Category C if fit for service in Canada only, etc.

Only men whose medical examination places them in Category A will be included amongst those required to join the colours in the first instance; the men placed in any other Category will remain at home until men in the Category to which he has been assigned are called to the colours. The men placed in Category A may still apply for exemption on any ground.

Men between the ages of 20 to 34 inclusive, who were unmarried or widowers without children on July 6th, 1917, are strongly advised to report before a Medical Board at once. This is the quickest and surest way for them to find out their status under the Act.

Parents and employers are also urged to have those in whose cases they are specially interested visit a Medical Board and undergo examination. The methods of examination are simple and will result in no discomfort or inconvenience.

Now is the time for employers to obtain facts of the greatest value to them in making their calculations. The Medical Boards will determine how many of their employees will be left at home for physical reasons and how many will be selected for service unless an application for exemption be made with success.

Issued by The Military Service Council.

RAILROAD NOW SPANS AUSTRALIAN CONTINENT

Second British System of Transcontinental Railroads.

The Australian continent is at last about to be spanned by rail. Completion of the event is timed for the last of October. The ceremonies which will mark it will signalize these facts:

Australia's transcontinental railroad system will be the second British system of its kind. The first historically is the Canadian Pacific system. The Cape-to-Cairo road in Africa, Cecil Rhodes' great project, has yet to be finished.

Allowing for differences in gauge there will be through transportation in the Commonwealth from the Pacific to the Indian Ocean. The greatest distance ordinarily involved will be 3,467 miles, from Brisbane, Queensland, to Perth, West Australia.

The completion of the federally owned 1,052 miles of railway in southern Australia between Port Augusta, South Australia, and Kalgoorlie, Western Australia, will bring the states of Queensland, New South Wales, Victoria and South Australia into direct contact with the at present quasi-isolated state of Western Australia.

This federal Port Augusta-Kalgoorlie line, commonly called the "East-West" railway, will link the state owned railway system of Western Australia with the successive state owned systems of South Australia, Victoria, New South Wales, and

Queensland.
The "East-West" railway eventually will virtually revolutionize Australian traffic, particularly that to and from England and Europe via the Suez-Colombo route. It will obviate the previously indispensable sea carriage of passengers, mails and cargo (other than for Western Australia) from Fremantle, West Australia, around Cape Leuwin to Adelaide, South Australia, in order to obtain their transportation by rail to Melbourne, Sydney, Newcastle, and Brisbane. The effect will be same westward from Pacific ports involving American imports for Western Australia. The saving in distance thereby will be 1,350 nautical miles, and in time from four to five days.

The road will furnish the famous Kalgoorlie-Koolgardie gold fields in Western Australia with an outlet other than Fremantle.

The "East-West" railroad not only will "represent the first attempt to provide a Commonwealth procedure and policy of railway management," to quote the Minister for Works and Railways, William A. Watt, but it will represent one of the last steps in Australian federation. Sir John Forrest, now Commonwealth Treasurer, refused when Premier of Western Australia in the late 90's to permit the then colony to federate with the other colonies unless a railroad be built binding the proposed union together. This condition the Commonwealth will have fulfilled when the railroad is finished.

The road was intended to cost \$20,228,000. When completed it will have cost \$33,336,000. The first sod for it was officially turned in September, 1912. Its building is regarded as an extraordinary railroad performance.

Unique among libraries is that of the United Engineering Society in New York City. In a fine, modern building, with a corps of trained librarians in attendance, is housed a collection of about 130,000 volumes and pamphlets, all dealing with some branch of engineering or with allied subjects such as geology or mathematics. Mr. Harrison W. Craver, director of the library, recently told of the organization, its history and the work it is doing now, before the New York State Library Association, at its annual convention.

The library, Mr. Craver states, is for the use of men of professional training rather than for students of elementary engineering or for men in engineering trades, who cannot find the books and periodicals they need in the public libraries. The aim has been to produce a reference library for the expert, a collection as complete as possible, of all knowledge along engineering lines.

Engineers come to the library for all sorts of information, and to seek the solution of many problems. No distinction is made between the members of the engineering societies and the public; any one who is looking for technical information of the kind that the library can supply is welcome to use the books and periodicals.

An especially interesting and most valuable branch of the work is the paid reference department. As Mr. Craver pointed out, engineers are of a nomad race; their work calls them to all parts of the globe, and they frequently find themselves unable to come to New York to consult the books needed. Such men are glad to pay for having the information obtained for them by a man who has sufficient technical training to be able to track down an engineering problem, and this information is sent out by mail. There have been requests from India, South America and China, as well as from points nearer home.

Some odd tasks are undertaken by this department. A company of mining engineers in Mexico recently sent \$150 and a request for a library of military engineering. There were difficulties in the way of delivering the books, but the resourceful librarian finally filled the order by dispatching a long procession of volumes in five-pound packages to the American Consulate in Mexico, via parcels post. A Cuban engineer found that his workmen of assorted nationalities were prone to walk the third rail or thrust their fingers into the machinery, so he asked the library to collect for him all the "safety first" placards, in any all the language, that were to be found. A long and careful search was made, and a large packing box full of the placards was eventually shipped to the engineer.

The history of the United Engineering Society's library dates back to 1902, when Mr. Carnegie offered to the five engineering societies, the American Society of Civil Engineers, the American Institute of Mining Engineers, the American Society of Mechanical Engineers, the American Institute of Electrical Engineers and

the Engineers' Club, the sum of \$1,000,000 for a library. The offer was accepted by all but the civil engineers, who already had a well-equipped library, and did not care to remove it to a central collection for general use. It was found advisable to treat separately the Engineers' Club, which was, therefore, given its share and separated from the others. In 1916 the civil engineers reconsidered and joined the United Engineering Society, the holding corporation which had been formed to administer the library. There were delays in getting the project started, but in 1912 the libraries of the three different societies had been united in one building, and the difficult task of recataloguing and making them one had been begun. Much still remains to be accomplished but more has already been done to make the engineering library an instrument of great service to the engineer.

Every Man
has his own
idea of Dress

Every man knows what suit suits him and what style fits him. His eye knows what is harmony and what is not.

Tailoring specialists contribute each their share in every item and idea in Semi-ready Clothes.

Semi-ready Tailoring is not flamboyant—but there are smart effects for younger men and distinctive styles for elders. \$18 to \$45.

REGISTRATION AT COLGATE.

Colgate University opened on the 4th, with an enrollment of over four hundred students. The latest authentic registration, given out by President Bryan, shows that three hundred and ninety-nine men have officially entered, while there are several more who have not registered as yet.

The senior class numbers over fifty, while about sixty men have returned from the junior class.

Over eighty men are back from the sophomore class. Up to date one hundred and twenty-five men have enrolled in the freshman class.

The offer was accepted by all but the civil engineers, who already had a well-equipped library, and did not care to remove it to a central collection for general use. It was found advisable to treat separately the Engineers' Club, which was, therefore, given its share and separated from the others. In 1916 the civil engineers reconsidered and joined the United Engineering Society, the holding corporation which had been formed to administer the library. There were delays in getting the project started, but in 1912 the libraries of the three different societies had been united in one building, and the difficult task of recataloguing and making them one had been begun. Much still remains to be accomplished but more has already been done to make the engineering library an instrument of great service to the engineer.

Every Man
has his own
idea of Dress

Every man knows what suit suits him and what style fits him. His eye knows what is harmony and what is not.

Tailoring specialists contribute each their share in every item and idea in Semi-ready Clothes.

Semi-ready Tailoring is not flamboyant—but there are smart effects for younger men and distinctive styles for elders. \$18 to \$45.
